"Oceans of Gladioli Bloom"—Section of our 100-acre Planting, to see which visitors are welcome

TY" DOLLAR COLLECTION

Raise the Leaf to the Left, and See Color Plate No. 1

IN order to introduce the Gladiolus to those who are not acquainted with its superior merits in bloom and beauty, every year I select six fine sorts, covering a rich range of color, of which I mail one strong-blooming bulb each, for \$1.00, postpaid.

The results of a test of these six exquisite Gladiolus are invariably a convert to the merits of my favorite flower and a regular customer thereafter. The varieties offered this year are unusually fine ones, and the bulbs have been grown with an especial care. Simply plant them in any soil good enough to grow corn or potatoes after the ground has warmed up in the spring. You will be surprised and charmed with the splendid profusion of bloom that you will have.

Berlinia. Beautiful shell-pink, marked with strong carmine. Flowers extra large.

Eldorado. Deep cream-yellow, lower petals spotted with maroon and black; medium-sized flower.

General de Nansouty. Rich bluish purple, marked with vivid crimson and lemon-yellow. Flower-stalk unusually long, bearing eighteen to twenty buds, half of which will open at one time.

Meadowvale. A very fine white, tinged in the throat with crimson, and lower petals slightly marked with faint pink. Stalk strong and vigorous, persistent in bloom.

Nilreb. Dainty pink, blending almost to white, marked with a strong shade of same color. Flowers large, and stalks vigorous.

Taconic. Bright pink, flecked and striped with shades of same color, markings of lower petals deep crimson, running into pale lemon-yellow. Plant vigorous and flowers large.

Blooming in September, it gives a touch of color to the shrubbery planting at a time when color is most desired
